ABOUT THE TRAINING

WHO SHOULD ATTEND: This introductory course is designed for individuals who have a basic understanding of the compliance assessment requirements for any asbestos regulations within its state, region or territory. This class is intended for air quality professionals whose role is to inspect facilities which contain asbestos related materials and determine regulatory compliance status with any state or federal asbestos regulations.

LEARNING OBJECTIVES: Those completing this course will gain an understanding of how to conduct an asbestos compliance assessment. Attendees will be able to assess the following factors related to asbestos control programs:

- Health effects of exposure to asbestos
- Identifying asbestos containing material
- Asbestos Inspector Safety Guidance
- Respiratory Protection
- Protective clothing
- Asbestos NESHAP regulation
- PRE: inspection planning
- Facility and landfill inspections
- Asbestos air sampling and analysis

COURSE DESCRIPTION: This introductory course covers the basics of asbestos regulation, health effects, and identification of asbestos containing materials, OSHA Asbestos Standards, EPA Worker Protection Rule, STEM Guidelines, abatement techniques, respiratory protection requirements, protective clothing, and an in-depth review of the Asbestos NESHAP Regulation.

SPACE LIMITATION: Registration is limited to 35 attendees. Air quality staff from the fifteen western states receive registration preference.

REGISTRATION FEES: There are no registration fees for state, local or tribal air quality agency staff. For federal employees, the registration fees are \$300.

TRAINING LOCATION
